

SOS Children Making a difference

SOS CHILDREN'S
VILLAGES

A loving home for every child

SOS Children is a global authority on nurturing and supporting families. We provide direct care for orphaned and abandoned children, and we work with local communities to keep fragmenting families together.

SOS Children builds and runs nursery, primary and secondary schools and provides skills training for young people and adult carers. Our medical centres provide essential healthcare tailored to the needs of local communities.

SOS Children has a long-term presence in many developing countries, so we are well placed to help in times of crisis.
